#### Kate Arslambakova Artists Statement

Since a young age, I have been fascinated by the world inside us, how these complex systems develop and work together to help us function. While working in a lab after undergrad, I delved into the microscopic world which explicitly impacted the direction my art practice would take. In my current work, I attempt to dissect, reconstruct, and connect the structures of the body with the outside world. Through the visual play of colors, textures and shapes in each painting, I aim to arouse curiosity of the viewer and lure them in for a closer look, in hopes to elicit a dialogue about their relationship with their own anatomy.
